PROFESSIONAL SUMMARY

Computer Science graduate with professional experience in Technical Support and hands-on project experience in Mobile Application Development. Proficient in Flutter, Java, and MySQL, with practical skills in Native Android integration. I enjoy troubleshooting complex bugs and collaborating with teams to deliver stable, user-friendly software. Eager to apply my skills in fintech and payment solutions.

WORK EXPERIENCES

Qinetics Solutions Sdn Bhd 09/2024 – 05/2025
Application Tech Support

- Provided application-level technical support for a domain services platform, resolving bugs and system issues using Java, Spring Boot, MySQL, and Angular.
- Collaborated closely with the development team to troubleshoot issues, implement bug fixes and deliver system enhancements requested by senior management.
- Assisted in feature development and system improvements, contributing directly to platform reliability and service continuity.
- Conducted daily operational checks, including monitoring emails and managing expired domain records to prevent revenue loss.
- Created technical and operational documentation to support knowledge transfer and onboarding of future team members.

ZNN Technology Sdn Bhd 09/2022 – 12/2022
Programmer Trainee

- Developed a mobile application for a kindergarten using Flutter and Firebase to support daily operations and parent engagement.
- Implemented key features including online fee payment, student timetable viewing and activity updates for parents.
- Enabled the kindergarten owner to digitally manage student records and payments, reducing manual administration effort.
- Conducted application testing and bug fixes to ensure stable performance and user-friendly experience prior to release.

District Government Office Terengganu 07/2019 – 09/2019
Software Developer Trainee

- Developed a web-based Room Booking System using HTML, PHP, MySQL and Dreamweaver to resolve scheduling conflicts between multiple departments.
- Analyzed user requirements and translated them into functional system workflows, reducing double-booking issues to zero after deployment.
- Participated in weekly progress review meetings with supervisor to ensure timely delivery and alignment with business needs.
- Successfully designed, implemented and deployed the system, improving internal coordination and operational efficiency.

SKILLS

Backend : Java, Spring Boot, MySQL, PHP, Express.js

Frontend : JavaScript, Angular, React.js, HTML, CSS, Bootstrap, Tailwind, Python

Mobile : Flutter, Firebase

Tools : Git, Maven, Postman

Soft Skills : Technical Support, Quality Assurance, System Documentation, Debugging

EDUCATIONS

Universiti Teknologi MARA (UiTM)

10/2020 - 02/2023

Bachelor of Computer Science (Honours)

Universiti Teknologi MARA (UiTM)

06/2017 - 12/2019

Diploma of Computer Science

CERTIFICATIONS

CCSD Certified - CCSD

Java Foundation - Oracle

PROJECTS

SafeWalk - Personal Safety Companion App

- Role: Full Stack Developer
- Tech Stack: Flutter, Node.js, MySQL, Socket.io, FCM
- Built a real-time safety app using Flutter for the UI and Node.js for the backend.
- Used Native Android services to keep GPS tracking active even when the app is closed.
- Implemented live location sharing with Socket.io and stored user history in MySQL.
- Link: github.com/NurDiyanaAziz/safewalkapp (*Repository is private*)

LeaveFlow - HR Management Mobile Application

- Role: Mobile Application Developer
- Tech Stack: Flutter, Express.js, MySQL, FCM
- Created an HR app using Flutter and connected it to a MySQL database.
- Added Firebase (FCM) to send instant push notifications to managers for leave approvals.
- Implemented secure login using JWT and collaborated with a team to fix bugs and test features.
- Link: github.com/NurDiyanaAziz/leaveflow

Colipid – A Mobile App for Lipid Monitoring with Meal Recommendation System (FYP)

- Role: Full-Stack Developer
- Tech Stack: Flutter, Firebase
- Built a health tracking app using Flutter for the UI and Firebase for real-time data storage.
- Developed a smart meal recommendation system based on user health data.
- Won the Gold & Best Innovation Award at the International Medical Innovation Competition (IMIC) 2025.
